Seattle Institute for Biomedical and Clinical Research Spotlight Feature

Eileen Lennon, PhD

After nineteen years as Executive Director of Seattle Institute for Biomedical and Clinical Research I have made the difficult decision to retire. It has been and continues to be a pleasure to lead this organization in serving dedicated VA staff and your research and education programs. It is very rewarding to know that SIBCR has provided needed support to you over the years and that in some way we are part of your incredible endeavors to assist the Veterans. A significant part of the experience has been working with the Board of Directors who provided outstanding leadership and direction over the years and continues to contribute to SIBCR's success. This dedicated leadership, the management team and staff of SIBCR will continue to effectively and passionately support the SIBCR mission.

My years with SIBCR have been personally and professionally rewarding and it is wonderful to work with so many dedicated, extraordinarily talented people. I will miss the many friendships that I have made over the years at SIBCR and VA. A major plus was the many leadership positions I was able to pursue in our national organization, National Association of VA Research and Education Foundations.

This relationship with NAVREF allowed me to work locally and nationally to assure best practices were developed for the VA-affiliated nonprofits and on many occasions to represent our organizations to the VA and other important stakeholders. This position also afforded me the opportunity to connect with the local research community and the many excellent research organizations in the Seattle area.

I will have many fond memories of these years and look forward to keeping in touch with my friends and colleagues.
